

25. (once amended) A wire for use in the formation of an occlusion within a vascular cavity in conjunction with a microcatheter having an interior lumen, said wire comprising:

a metal coil having a first shape which conforms to said microcatheter lumen when within the microcatheter, and said metal coil forming an unbiased, regular cylindrical or unbiased single regular conical envelope when disposed out of said microcatheter.

In Claim 26, line 1, delete "wire" at the second occurrence and insert - - coil - -.

In Claim 27, line 1, delete "wire" at the second occurrence and insert - - coil - -.

In Claim 28, line 1, delete "wire" at the second occurrence and insert - - coil - -.

Remarks

Claims 1-24 were originally with the Application and cancelled by way of a preliminary amendment. Claims 25-34 were added by the preliminary amendment. By the present amendment, Claims 26 - 28 have been amended. Therefore, Claims 25-34 submitted for substantive examination on the merits.

Claims 25-31 and 34 were rejected as double-patterning over Claims 13-23 of U. S. Patent 5,122,136, upon which the present Application is a copending continuation in part. Applicant submitted a terminal disclaimer in compliance
